The Year Book of the
Southern Alberta Institute
of Technology

1960 - 1961

During your stay at Tech you have received instruction to better equip yourself for a future occupation. Also, while attending Tech you have become familiar with methods of meeting and making friends to make your stay more enjoyable.

By combining these two phases of training, you have prepared yourself to be an intelligent citizen of our complex world.

With this in mind, the yearbook aims to record the many wonderful moments which you have had during your stay at the Institute. The recording of the numerous activities ensures enduring memories of these wonderful and pleasant moments.

I wish to thank the yearbook executive, the staff sponsors, and all the students who have helped in the compiling of this edition of the Tech Art Record.

ANDY HUDAK
Editor.

DEDICATION

In 1916 an era began; in 1960 an era ended. They are not one and the same era, for, indeed, several important chapters have been written into the history of the Provincial Institute of Technology and Art since its inception in 1916.

That 1960 was indeed the end of an era cannot be disputed. Its significance was two-fold. The official name of the Institute became the Southern Alberta Institute of Technology, severing forever a most tangible link with the past. It saw, too, the inevitable parting of the ways of the Institute and the University of Alberta in Calgary, the latter moving to its new campus. The scrolls on the following pages are ample testimony to the spirit of mutual understanding and cooperation that existed during the "sharing" years.

Each institution enters the new era with a campus of its own, and therefore with the opportunity to put into effect well formulated plans for expansion to better meet the educational needs of community, province and nation. To the future of the Southern Alberta Institute of Technology — to the future of the University of Alberta in Calgary — we dedicate this 34th edition of the Tech Art Record. May each reach its full potential and a new stature in the community of learning institutions.

We, the undersigned, on March 31st, 1960, near the end of the last academic year that the University of Alberta in Calgary will share the same campus as the Institute of Technology and Art, give the Institute greetings. From 1922 to 1940 we were together as the Institute and the Calgary Normal School. In 1945 when the University of Alberta became responsible for teacher training in Alberta, and after the interim of five war years, we came together on the same campus again. In the years since 1945, both the University of Alberta in Calgary and the Institute of Technology and Art have educated together, sharing the same location, dedication and good fellowship. The location we leave, both to improve your and our facilities; the dedication and good fellowship will remain as we both move forward.

IN COMMEMORATION

This scroll is presented by
the staff of the
Provincial Institute of Technology and Art
to the
University of Alberta in Calgary
to commemorate many years of happy
association on the same campus between the
Institute and the Calgary Normal School,
from 1922 to 1940, and later between the
Institute and the University, from 1945 to 1960,
when the University moved to its new campus.

A MESSAGE TO THE
STUDENTS FROM
Hon. A. O. Aalborg
Minister of Education

To the Student Body of the Provincial Institute of Technology and Art

Recent years have witnessed a great upsurge of interest in vocational and technical training in this country and elsewhere. This reflects the rapid industrialization of our economy, the greater use of new machines, the development of the wizardry of electronics, and the creation of a host of new forms of equipment. The students of a school such as the Institute are in the midst of this transformation and by their presence indicate that they have an awareness not only of their personal need to be fitted for skilled employment, but of the need of their country for persons trained to meet the challenges of change and expansion.

The Department of Education is proud of the Institute and of the contribution it makes to the welfare of all. Since this contribution is actually made through the students who receive their training there it follows that we are proud of its students and graduates.

To those who are about to complete their courses and enter into their life work we extend greetings and best wishes, with every confidence that they, as their predecessors have done, will bring credit to the Institute and to the Province of Alberta.

Yours sincerely,

Andrew D. Halberg

Provincial Institute of Technology and Art

EDUCATION BUILDING
13TH AVENUE AND 10TH STREET N.W.
CALGARY — ALBERTA

TO THE STUDENTS OF THE CLASS OF '61:

When the Institute moved in 1922 from the Colonel Walker School in east Calgary to the present campus, the Honourable Perren Baker, the then Minister of Education, issued formal invitations to numerous people to attend the official opening ceremonies of the new buildings. On the inside cover of the invitation the Minister thoughtfully included the following quote by Thomas H. Huxley:

"Education is the instruction of the intellect in the laws of nature, under which name I include not merely things and their forces, but men and their ways; and the fashioning of the affections and of the will into an earnest and loving desire to move in harmony with those laws. For me, education means nothing more nor less than this. Anything which professes to call itself education must be tried by this standard, and if it fails to stand the test, I will not call it education, whatever may be the force of authority, or of numbers upon the other side."

These words may be said to have been the goal toward which the Institute programme of courses has been directed over the years and will, I trust continue to be directed during the years to come. If the students of former years have reached the goal then their attendance at the Institute will have been worthwhile.

It is now our sincere hope that the graduates of the class of '61 will ultimately reach this goal. Not immediately, because this is the work of a lifetime. As you leave the Institute we trust that as a result of your having been here you will inevitably move toward that state of desire and understanding and harmony so ably described by Thomas Huxley. If you do this you will, I am sure, be successful. This is our wish for you.

Our New Child

Yuen Po Sum

In September of 1960 the "Im Chang Sik Story" came to a happy conclusion. After spending two years at the Sung Ae Wong Orphanage in Seoul, Korea, Im Chang Sik and his younger brother were claimed by an aunt who is able to provide both with a home, and with love and affection.

The balance of Im Chang Sik's funds were immediately transferred to a little Hong Kong boy, Yuen Po Sum. Unlike his predecessor, Yuen Po Sum lives with his parents and four brothers. Unfortunately, the financial plight of this family is critical. Their home is a dilapidated ten-foot-square wooden shack built on the roof top of an old tenement building. Both parents work, but the combined income is a meager \$26.00 (in Canadian currency) per month.

Our support payment of \$180.00 per year provides Yuen Po Sum with food, clothing, specific medical care, welfare service, and the opportunity to attend school.

To the left is a picture of Im Chang Sik in his new environment, proudly displaying his copy of the 1959-60 Tech Art Record, which was dedicated to him.

This year's cover was designed by Roger Duncan, a second year Art student majoring in Industrial Design.

A NOTE FROM THE ART EDITOR...

The theme of this 34th edition of the Tech Art Record reflects the Institute's impressive growth from its early years to the present.

The duotone divider page used throughout the book demonstrates this steady growth most effectively.

Shown in the main portion of the photograph is the campus as it looked in 1927, while in the upper portion is an aerial view of the campus as it looked some 30 years later.

I would like to take this opportunity to express my thanks to my assistant, and to those fellow students, Gary Knight, Alex Kozub, and Harry Savage for their valuable contributions to the art work in this book. It is their work

The year 1961 is unique in that 1961 turned upside down is still 1961! This phenomenon last occurred in 1881, and will not occur again until 6009. Roger was not designing yearbook covers in 1881, and will undoubtedly not be designing yearbook covers by 6009. Who can blame him, therefore, for taking full advantage of this one and only opportunity to use the fully reversible digits "1961" as the major factor in his design?

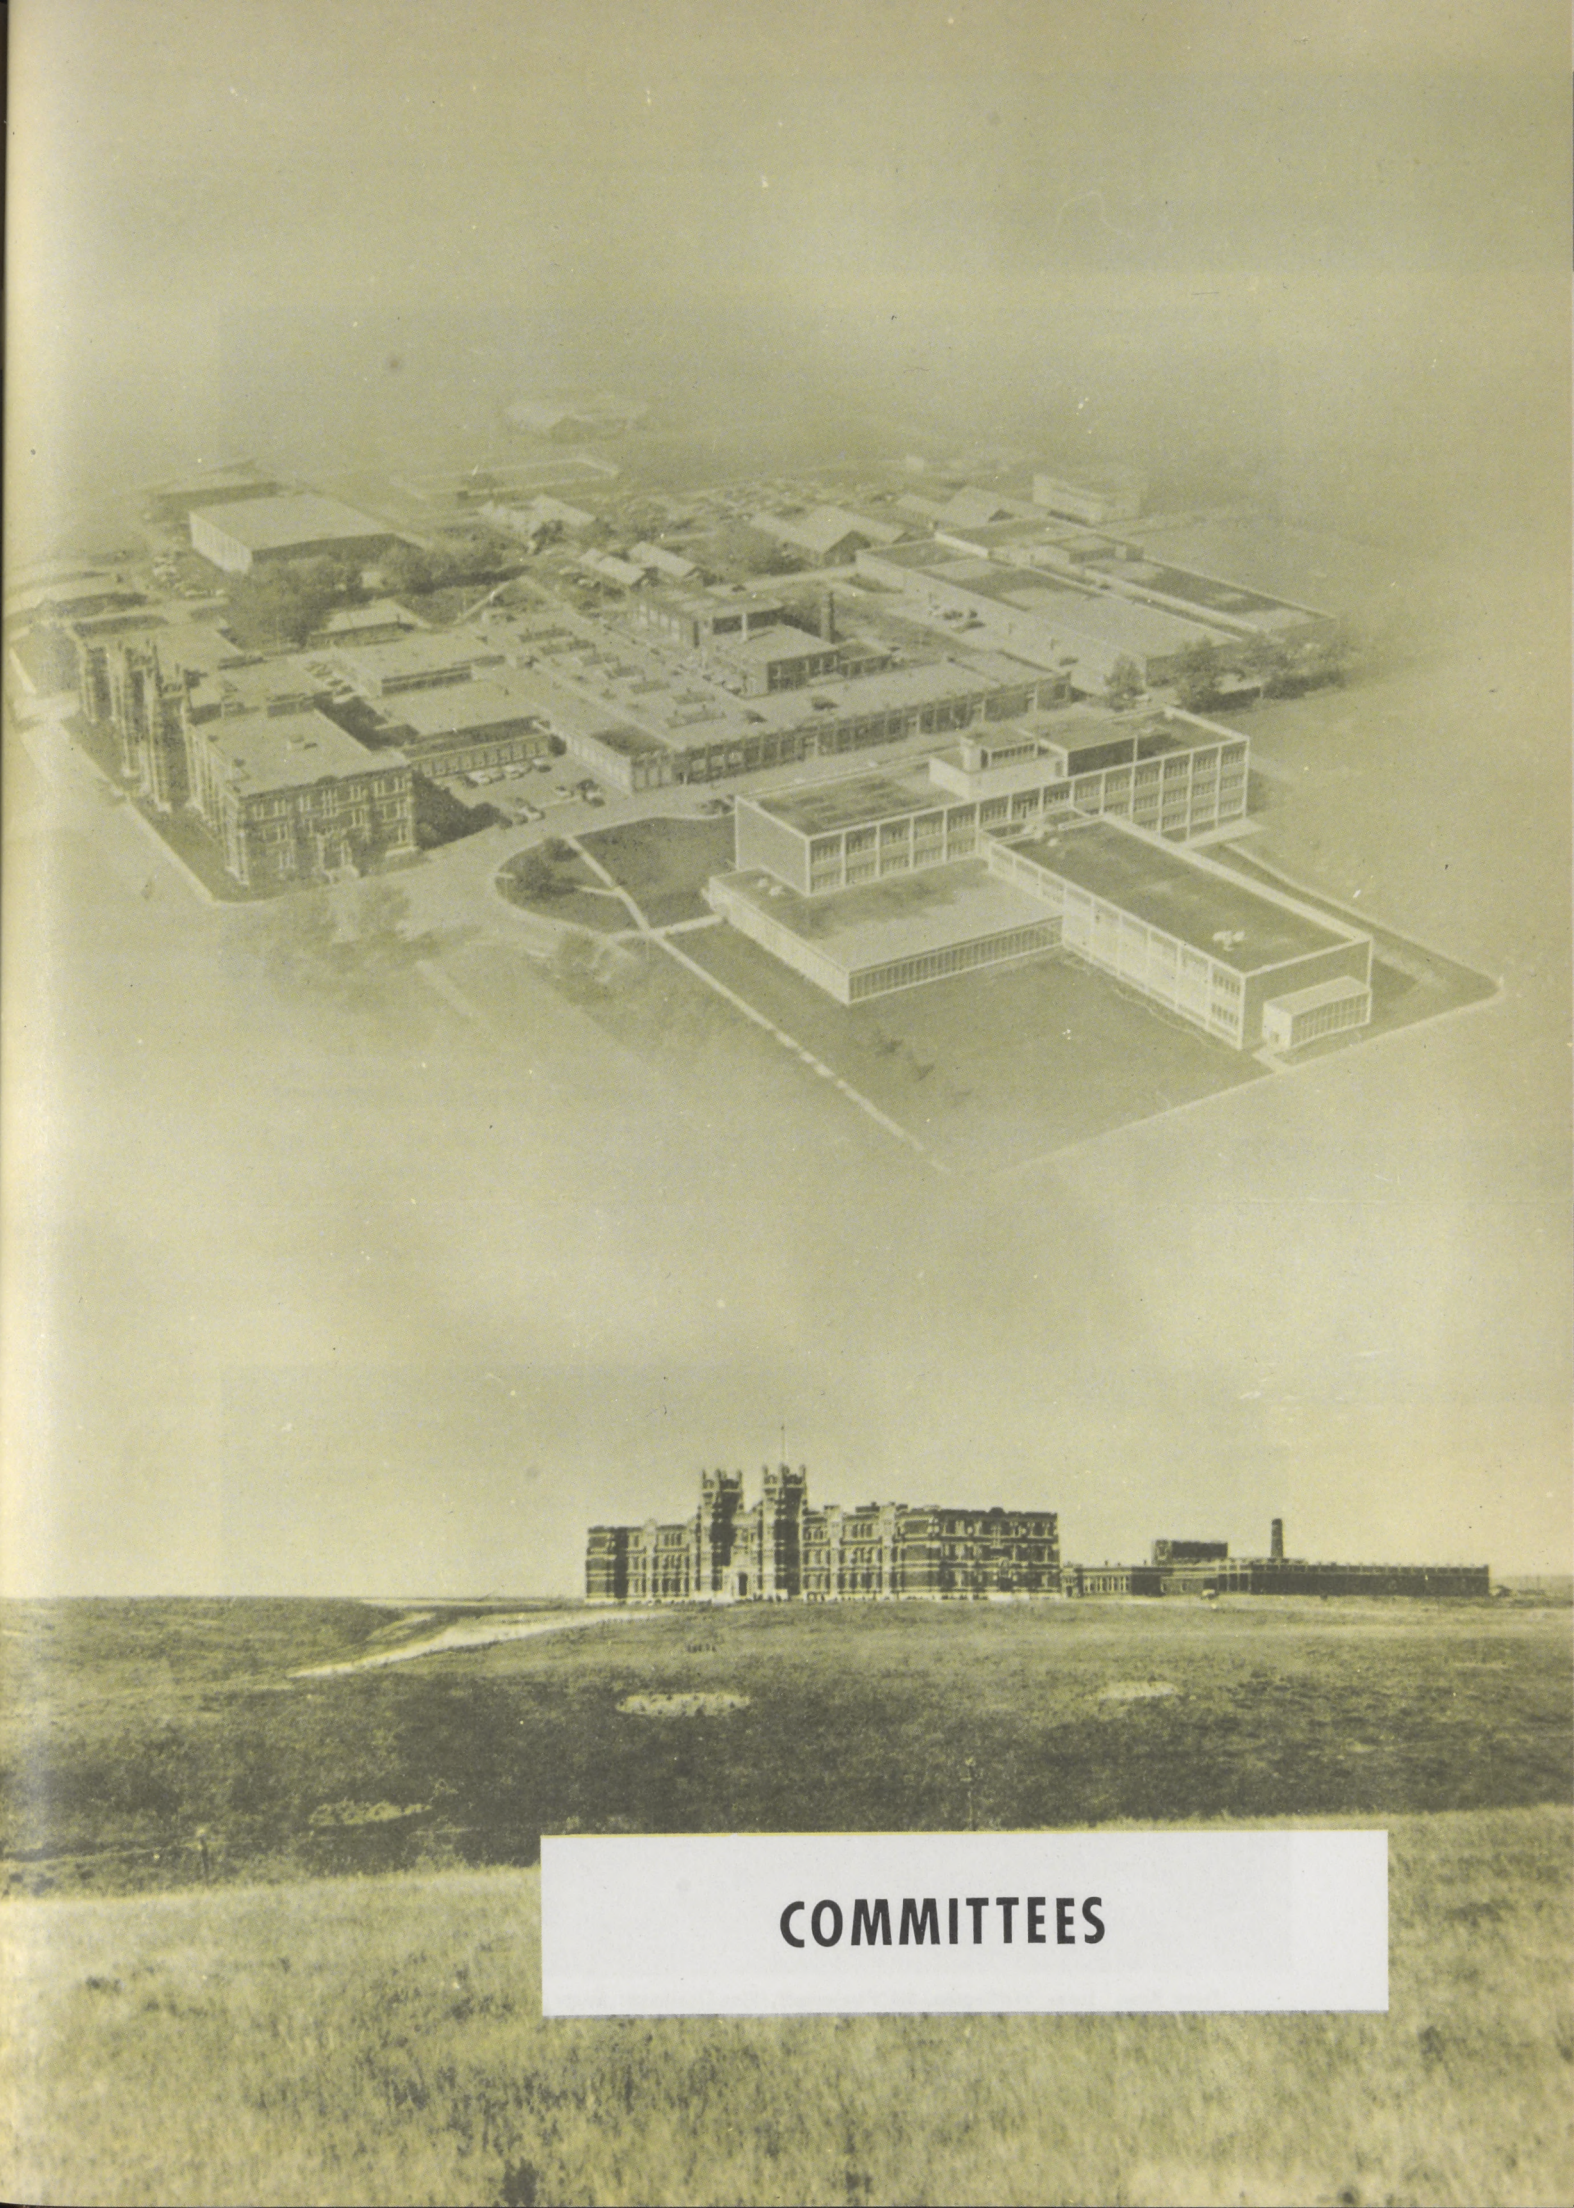

In past years the design has been confined to the front cover. This year, however, the spine and rear cover have received their share of attention — an innovation we hope will be continued in the future.

throughout that tends to keep the informal appearance that is so much desired.

In Closing, I trust that each and every one of you will be proud of your yearbook. It should rank as one of your most cherished reminders of the 1960-61 term at "Tech."

Roger Duncan

The meter that measures our standard of living

It measures kilowatt-hours...and as the kilowatt-hours grow, it indicates the ever-greater role of electricity in making our lives easier and more enjoyable.

Abundant low-cost electricity probably contributes more to our standard of living than any other factor. It creates opportunity for industry and business...it speeds the production of goods...it opens the way to hundreds of thousands of better-paying jobs for Canadians.

Kilowatt-hours cost so little—but think of what they can do. In the home, low-cost electricity can bring a world of convenience, comfort and service. Planned

lighting brings glare-free new pleasure and charm to every room—at the flick of a finger. In the kitchen and laundry electrical appliances save time and toil. Television and many other products contribute to our leisure and entertainment.

Are you making full use of inexpensive electricity?

To make full use of modern electrical equipment—in home, office or factory—an adequate wiring system is essential. Your local power company, provincial Electric Service League or any qualified electrical contractor will assist you in planning to “Live Better...Electrically.”

NEW JOBS FOR THE ARTISTIC

CITY OF CALGARY

More than ever before, business is demanding specialists with technical education.

The Institute has supplied men and women for many years with these special skills to industry.

The "Tech" has a new name now — may the students who graduate from the Southern Alberta Institute of Technology and Art uphold the old traditions, but go forward to greater fame.

Many doors are opened to you because of your training and preparation. Take this opportunity and use your ability to keep them open.
